

Thank You

Dear **Nishi**,

Thank you for your carbon mitigation donation!

Your support will plant trees that reduce your carbon footprint, mitigating the emissions created by activities like flying and driving.

Absorbing carbon is just one of the benefits that trees provide. They also produce oxygen, provide homes for wildlife, can reduce flood risk and are proven to boost our health and wellbeing.

That's why the Woodland Trust has planted more than 38 million trees since our foundation in 1972 and is aiming to have planted 64 million – one for every person in the UK – by 2025.

Thanks again,
The Woodland Trust
